CLOUD DEVOPS

Move at the speed you need to stay competitive

Accelerated time-to-market, continuous innovation and improved quality of applications are all reasons companies implement a DevOps model. However, not all organizations have the experience or specialized skills required to successfully implement their DevOps transformation. With TierPoint, you can offload your DevOps challenges to our cloud experts who will help you define and develop your strategy, and select the right tools and platforms customized to your unique business needs.

Our DevOps specialists have the expertise to help you build a plan, implement, and optimize your DevOps transformation — so you can move at the speed you need to stay competitive.

Reduce Risk and Complexity

Our skilled and experienced team can help you select the right tools and platforms and recommend best practices to eliminate any potential pitfalls, so you can drive your DevOps transformation.

Faster Time to Market

Achieve shorter development cycles and gain continuous software delivery while ensuring the highest quality products. Cloud DevOps enables you to deploy software features quicker and with faster resolution of problems.

Improved Collaboration

Streamline communication between your development, QA, and operational teams to accelerate software deployment and improve product delivery.

Stabilize Your Processes

Drive incredible quality and stability at all stages of your IT delivery lifecycle with advanced tools and platforms.

Enforce Consistency

Standardize infrastructure provisioning and the software release process to enforce consistency within your organization.

TierPoint

Power Your Applications with Our Suite of Capabilities

Automation

Applying automation to your application environment helps you better serve your customers and be more successful. With DevOps automation you can perform tasks with reduced human assistance so you can accelerate processes and quickly scale. Our cloud consultants can help you define, plan, and implement your automation goals so you can accelerate and grow.

Continuous Delivery

Produce software in shorter cycles and ensure your software can be reliably released faster. With a continuous delivery approach to software development, you can begin building, testing, and releasing software with greater speed and frequency - deliver updates faster, find and address bugs more quickly, and automate your software release process.
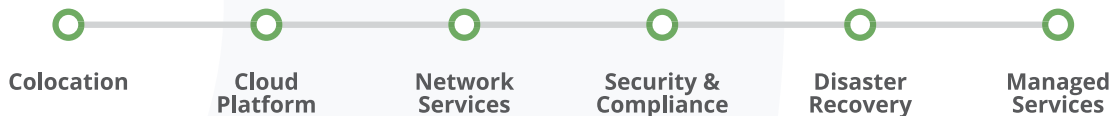

Site Reliability Engineering

Our cloud consultants can help you define, build, and incorporate the principals of Site Reliability Engineering to ensure your products, applications, and services function reliably and deliver optimal performance. With SRE you can achieve top performance of your software development and delivery.

Choose the Cloud that's Right for You

TierPoint is cloud agnostic. Our primary focus is on establishing the best venue possible for workloads and applications so that you can reach your business goals while meeting performance and availability requirements. We can also help you place your cloud almost anywhere, including our colocation data centers, in a private cloud, or public clouds like Microsoft Azure and AWS.

We are a Hybrid IT Provider Delivering Exceptional Customer Service Across a Broad Spectrum of Solutions.

Along with private, public, multitenant, and hybrid clouds, TierPoint offers an extensive portfolio of managed services and data centers. As your IT strategy evolves, we meet you where you are and help you along your journey.

Colocation — Cloud Platform — Network Services — Security & Compliance — Disaster Recovery — Managed Services

Find Your Cloud Today

Let us help you optimize your IT infrastructure with the right clouds for your business and workloads. Call **844.267.3687** or email **sales@tierpoint.com** to connect with one of our advisors.

About TierPoint

TierPoint (tierpoint.com) is a leading provider of secure, connected IT platform solutions that power the digital transformation of thousands of clients, from the public to private sectors, from small businesses to Fortune 500 enterprises. Taking an agnostic approach to helping clients achieve their most pressing business objectives, TierPoint is a champion for untangling the complexity of hybrid, multi-platform approaches to IT infrastructure, drawing on a comprehensive portfolio of services, from public to multitenant and private cloud, from colocation to disaster recovery, security, and more. TierPoint also has one of the largest and most geographically diversified U.S. footprints, with dozens of world-class, cloud-ready data centers in 20 markets, connected by a coast-to-coast network.
